

Sea Water Desalination Units

The first regionally based company with emergency water and wastewater rental unit.

Units can be supplied on rental basis, water produced basis, with operating staff, with chemicals and consumables. Rental periods can vary from months to years.

AquaTreat quick response mobile units offer a 24/7 deployment of large-scale water solutions to minimize downtime.

Fast Track Water

Aqua-treat delivers water fast - when and where it is needed. AquaTreat combine highly mobile and modular design, to deploy, install and commission mobile water solutions within days.

Efficiency

AquaTreat mobile systems are highly efficient in supporting fast track water production, whether fulfilling continuous operation, just covering peak loads. Or covering shut down periods.

Fine Tuned

The same can be modified to any kind of water, salinity, and site conditions. AquaTreat assets can be fine tuned for any specific requirement.

Maintenance

Aquatreat Operates Maintains its own Water Treatment and Desalination Plants, including site preparation, integration with existing systems.

Connectivity

AquaTreat Mobile Units, can be connected to the Grid, Generator Modules and/or Solar Panels. Plug and play solution delivered to any site.

Mobile

Our in house custom build units comes all in 20 foot or 40 foot container modules, easily moved from one site to another.

COMPREHENSIVE O&M

AquaTreat can provide units up to 1000 cum/hr, all in prepackaged modules in containers or on trailers. All arranged for maximum mobility and rapid response. All pre-engineered as "Plug and Play" Modules.
